Arithmetic is the Science of Numbers; It also includes the art of computation; It is one of the branches of mathematics; It leads up to algebra and geometry. The method of expressing numbers is notation. The common notations are the Roman and the Arabic. Numeration is a method of reading numbers; It also designates places and periods. In addition, two or more numbers are made into one. Addition is a process of aggregation. The result sought is the sum or amount. The sum in value is equal to the numbers taken. In addition, numbers may be abstract or concrete. Rapidity in adding comes from practice. LESSON II. In subtraction one number is taken from another; The number diminished is the minuend; The number taken away is the subtrahend; The result is the difference or remainder. Subtraction is a process of segregation. Multiplication increases a number by repetitions of itself. The number taken is the multiplicand; The number of times it is taken is the multiplier; The answer sought is the product. Together the multiplicand and multiplier are factors. LESSON III. Division separates into distinct parts; It also measures one number by another; The dividend is the number divided; The divisor represents times or parts; The answer sought is the quotient. A multiple exactly contains a number. A unit divided into equal parts produces fractions. Fractions are expressed by a numerator and a denominator. Compound fractions are indicated multiplications. Complex fractions are indicated divisions....
