Excerpt from Forestry Manual of the Iowa State Horticultural Society Should be planted quite deeply - 18 inches or more - and then be well protected the first winter by being laid down and covered with earth, and if of tender varieties they should be protected every winter. The first year but one cane should be grown, the next not more than two, and the third a little fruit may be obtained. Plant in rows six to eight feet apart and train to trellis or stakes, vines four to eight feet in the row. A trellis may be made of three wires, the highest not more than four to five feet high, or stakes may be used from two to four inches in diameter. With the trellis you can cultivate or plow but one way, while with the stakes plowing may be done both ways. The pruning should be done in the fall, winter or spring, before the buds begin to swell. No definite rule can be given for pruning, but in doing it we should bear...
