Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Some Proofs in Elementary Geometry The proofs here given are such proofs as I have been accustomed to give in my own classes. They are written out for my pupils; but if any teacher finds them useful I shall be very glad. They are alternative proofs that may be used instead of proofs by limits. They are meant to be rigorous. By a lemma is meant a theorem that is assumed to have been proved, and which is needed in the proof of the theorem under consideration. By a ratio is meant that number by which the consequent of the ratio is to be multiplied to give the antecedent. By the product of two lines is meant the rectangle of which the two lines are adjacent sides. If they be broken or curved, they are to be straightened first. By the product of a line and a surface is meant the rectangular parallelopiped whose altitude is the given line, and whose base is a rectangle equal in area to the given surface. If this surface be broken or curved, it is to be flattened first. By a line is meant a straight line. If a line be broken or curved, it is so named. By two equal lines is meant- two lines that are equal in length. By two equal surfaces is meant two surfaces that are equal in area. By two equal solids is meant two solids that are equal in volume. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
