BellovinA serious security sourcebook for Web professionals and users. The front door is unlocked and wide open. The alarms not working and no ones home. All of your valuables, money, and intimate details of your life are just sitting inside, waiting to be taken. No, its not your house . . . its your computer. The Web now penetrates every aspect of our lives, from the home PC to the business office. But with each advance in convenience comes a geometric increase in vulnerability to the integrity of data and software as well as to the confidentiality of information. Although the flaws inherent in the Web are real, solutions are available. Let Aviel Rubin, Daniel Geer, and Marcus Ranum give you the answers. Heres a book thats valuable today and indispensable for the future. It includes basic and advanced techniques for client-side and server-side security, browser security, writing secure CGI scripts, firewalls, and secure e-commerce. Theres a special appendix that demystifies the complex world of cryptography....
